

Company Overview

Telev8 and Interact Solutions - Who are we?

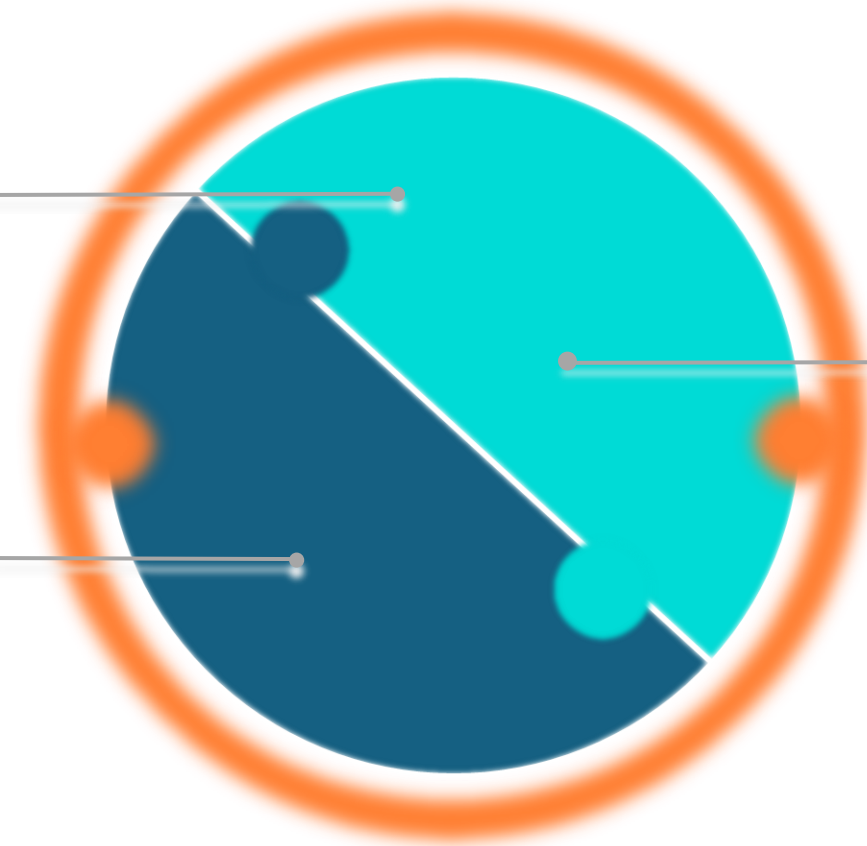

An ecosystem of parties

- Technology Integrator
- NaaS Platform
- Expertise in multi-family and hospitality verticals
- Designs and installs enterprise grade networks and digital media distribution services.

telev8™

- TVaaS Platform
- Content encoding & packaging
- CMS Platform management and support
- Software development
- Sales channel development

Solution Partnerships

Hardware

- UEI - Hardware Manufacturer
- RCA – Screen Manufacturer
- Future Electronics

Software

- Google Android TV – Operating System
- TiVo – Middleware Application
- Radix Software Systems

Content and Distribution

- Packet Fabric – Global CDN
- Warner Bros
- Paramount + Showtime - Programmers
- DirectTV – US Content Aggregator

TiVo

PACKETFABRIC

WARNER BROS.
DISCOVERY

The video programming and Internet products offered by legacy cable and satellite companies no longer meet the needs of an evolving marketplace. They are expensive and outdated, causing users to “cut the cord” in ever-increasing numbers.

Problem

High cost of linear and streaming TV content and distribution.

Poorly conceived and designed products that are difficult to use.

Complexity of installation and high cost of ongoing maintenance and support.

Lack of manageability and brand consistency for user interfaces.

High cost of commercial televisions.

Solution

Significantly lower cost with superior features and functionality.

Well-considered and designed software and hardware that simplify use and require minimal support.

Minimal onsite hardware requiring 80% less effort to install and activate. All systems are remotely manageable and require minimal onsite support after go-live.

Single management platform to control TV content, streaming apps and user experience.

No requirement for commercial TVs – operates any inexpensive consumer-based (non-commercial) TV.

Interact stands at the forefront of digital media and technology, offering advanced media programming, high-speed connectivity, voice services, and scalable “Internet of Things” (IoT) integration—positioning the company for strong growth across multiple markets.

A Superior Platform.

Interact has integrated the state-of-art managed networks and closed-loop, cloud IPTV platform by telev8 to deliver the most powerful virtual personal-area network, digital media distribution, and IOT solution for commercial use. It offers comprehensive remote management services to provide owners and operators with the most flexible and cost-effective solution available to the multi-family and hospitality verticals.

Effortless Connectivity and Smart Living for Apartment Communities.

Our turnkey solution simplifies technology management while enhancing the resident experience. We deliver high-speed Internet through managed networks, offering built-in linear TV, streaming, casting services, and integrates smart home features like keyless entry, climate control, and lighting automation. With instant move-in activation and no resident setup required, property managers reduce support tickets, streamline operations, and boost retention—turning tech into a value-driving amenity.

Lower Cost Home-Away-From-Home Hotel Television Experience.

Our solution delivers significant cost efficiencies and elevates the in-room experience by offering next-generation entertainment and connectivity. Designed specifically for the commercial multi-family and hospitality industries, it combines content and exclusive features unavailable anywhere else at a highly competitive price point. The resulting in enhanced guest satisfaction, reduced operational burden, and a modern edge technology that sets properties apart.

User friendly Senior Living Solution.

All the capability above with unique features and programming for seniors such as DVR, unified community messaging and simplified user interface.

Leisure World Seal Beach

Seal Beach, CA

To date, Interact has installed its digital media platform in over 661 units of this 6,608-unit community. The company has also signed agreements to provide high-speed Internet services, as well. With an 80% penetration rate, Interact could realize \$386,000 in additional monthly revenue (\$4,600,000 ARR). By building out all 16 mutuels (to include Internet service) we could increase revenues from \$21,979/mo. to \$386,000/mo. With *current* DirecTV agreements, we anticipate revenues will soon exceed \$43,727/month.

Catamaran Resort Hotel & Spa - Hotel

San Diego, CA

Interact delivers bulk television services and an interactive in-room experience — including app access, casting capabilities, and more—to this 315-room waterfront resort. By increasing services from 90 rooms to all 315 rooms, we can increase revenue from \$886.50/mo. to \$2,673/month.

Regatta 55 – Senior Living

Fort Worth, TX

This 126-unit upscale senior living community is currently served by Interact for Internet programming. The property will soon launch our telev8 service as part of an expanded service agreement. We currently charge \$29.99 per unit for 126 units. By adding bulk television, we will be charging residents another \$34.99/mo. This will result in an *additional* \$4,408/mo., for a total monthly revenue of \$8,188.

Jackson Heights Townhomes – Multi-Family

Sioux Falls, SD

Interact currently provides high-speed Internet and video programming to this 56-unit property. We are not currently charging for any television. It will take approximately \$5,000 of CapEx cost to replace the server needed to resolve Internet deficiencies. We then start charging for television. Once Interact starts charging for these services, the additional TV revenue (assuming a 70% capture rate charging \$69 for TV) will translate into \$2,700 in additional monthly revenue. Anticipated total revenues at Jackson Heights are \$4,940 per month.

Current Channel Partners

Indirect Sales Partners

Viking Broadband

Billings, MT

This ISP currently serves 35 cities in Eastern Wyoming and Montana with 61,000 residential customers and will resell Interact's services to residential, multi-family, hospitality, and senior living facilities. They will resell Interact's services to their customers across Eastern Wyoming and Montana. Interact has already installed the necessary hardware and is ready to begin billing once the final contract is signed. With 40 customers already installed, the result is immediate revenue of \$5,000 per month to Interact.

Circa Innovations

New Orleans, LA

Circa Innovations is a system integrator specializing in high-speed wireless Internet and smart building solutions for multi-family, hospitality, and senior living properties including historic conversion projects across New Orleans and the wider Gulf Coast region. They currently serve 100+ sites. The company will resell Telev8's video programming platform to its client base. Circa's first location (already installed) is The Jackson Apartments, which is open and ready for new residents to sign-up for Interact's services. If Interact installs just 20 of these multi-family properties (5,000 units), this will result in a minimum of \$10/mo. per unit, or \$50,000/mo. in total. Total immediate revenue of \$2,000 per month to Interact requires no expansion whatsoever.

SkyNet Communications

Bozeman, MT

Skynet Communications is a local ISP delivering Fiber-like speeds via fixed wireless Internet to customers in the Bozeman, MT area. This ISP currently serves 700 residential customers and will resell Interact and telev8 services to residential (pending retransmission consent agreement approval), multi-family, hospitality, and senior living facilities across western Montana. This customer is awaiting a signed contract to begin reselling Interact's services. This will result in a minimum of \$5,000 in revenue per month for Interact.

Groove Technology Solutions

Midvale, UT

Groove Technology Solutions provides integrated Internet, video, and smart building services for hotels, senior living, and other properties. They are the third largest (by room count – largest by property count) and fastest growing DirecTV Dealer in the United States. The company has committed to growing their senior housing distribution to over 100,000 units (with over 60,000 already committed). 10,000 units will be installed within the next 120 days, representing \$50,000+ in monthly revenue to Interact.

Strengths

- Proprietary integration of networking, IPTV, cloud, and IoT
- Scalable infrastructure for multi-market vertical deployment
- Customizable digital experience templates for sector types enhancing user engagement
- Ready for market product – minimal investment required for product development
- Foundation to build a recurring revenue model
- Speed and Ease of implementation
- Low CAC (Customer Acquisition Cost)
- Leadership experience and market relationships
- Platform offers consistency of user experience

Weaknesses

- High capital requirements for infrastructure
- Maturity of management structure
- Capital requirements to resource business for maturity
- A more complex tech stack demands skilled personnel

Mitigations

- Create financing model to minimize initial capital outlay
- Implement processes and governance
- Build processes to provide governance and structure
- Add headcount in focused areas.

Threats

- Competition from large telecom/media players
- Fast-paced tech changes requiring constant updates
- Increased exposure to cybersecurity threats
- Recruitment and retention

Mitigations

- Speed to market through channel sales. Rapid innovation and agility
- Innovation focus enables rapid adaptability
- Deploying specialist resources to mitigate threats
- Hiring from existing networks

Opportunities

- Rising demand for smart environments
- Capitalize on existing technology partnerships
- Future market expansion into other global regions
- Development of global hotel brand partnerships
- Development of new global technology relationships
- Targeted advertising model

Initial Priorities

Translating a \$500,000 capital raise into \$122,921 in *monthly* revenue

Property/Customer	Capital Requirement	Additional Monthly Revenue
Jackson Heights	\$5,000	\$4,940
Regatta 55 Townhomes	\$15,700	\$8,188
Circa New Orleans	None	\$2,000
Catamaran Hotel	None	\$2,673
Viking Broadband	None	\$5,000
SkyNet Communications	None	\$5,000
Groove Technologies	\$50,000	\$50,000
Alta	None	\$1,393
Leisure World	None	\$43,727
Salaries, Operating and Other Expenses	\$287,300	N/A
Amounts owed to UEI	\$142,000	N/A
TOTAL	\$500,000	\$122,921

Phase 2 Priorities

Adding another \$385,000 in monthly revenue

Fully installing Leisure World Seal Beach requires \$2,400,000 over the next 24 months but results in \$385,000 per month in additional revenue. Interact believes that debt capital may be available for this capital outlay.

There are 16 mutual associations in this 6,608-unit residential community. Interact is currently fully installed for provision of video services at 661 units. Interact has also contracted to provide Internet services in addition to these video services. However, in order to provide these Internet services, Interact will need to invest \$2,400,000 in infrastructure hardware over the next 12 months. Once these capital investments are made, the company will enjoy a steady stream of new monthly revenue (estimated at \$385,000 per month) into the foreseeable future. Interact believes that once its Phase 1 priorities are accomplished and a foundation of stable monthly revenue is achieved, the company will be able to finance (with debt) the necessary capital improvements at Leisure World based upon the minimum guarantees contained in its amended Mutual agreements, three of which are already signed.

The background is a dark blue field filled with a complex network of glowing blue and white nodes connected by thin, light blue lines, creating a sense of digital connectivity and data flow.

The Interact Solutions Team

Industry Leaders Innovating Together

Meet the Team

The Architect (CEO)

An experienced media industry executive with over 30+ years of deep hospitality expertise – a disruptor with many 'Industry Firsts' under his belt

The Technologist (CTO)

Product development expert with 20+ years specializing in building innovative applications for the hospitality industry – Paul is the futurist, technologist, and atomic glue of the telev8 architecture

The Problem Solver (CCO)

Results-driven expert in the cross-platform content distribution and acquisition eco system. Creator of new business models. Persuasive advocate, strategic negotiator and solutions-oriented business partner.

The Evangelist (CRO)

A passion for creating the right chemistry for businesses to flourish. He has consistently been at the leading edge of hospitality guest-facing technology thinking.

The PacketWhisperer

An expert in decoding network traffic and solving complex IP issues with precision and quiet mastery. Trusted to keep data flowing smoothly and securely.
