markets

suggested partnership and strategic opportunities

telev8 partnership

provide telev8's next generation TV-as-a-Service (TVaaS) and Network-as-a-Service (NaaS) platforms to support commercial venue (Multi-tenant, Senior Living and Hospitality) deployments

expand your offerings to include managed linear television

allows you the ability to bundle television services with their Internet services in multi-family deployments making them a single source vendor for all services

tightly integrate platforms for ease of use and support

telev8's API integration will provide you with the ability to 'white label' the telev8 TVaaS platform and integrate with their Internet services to provide a seamless platform for multi-family residents to access our 'instant on', upsell capabilities and account management features.

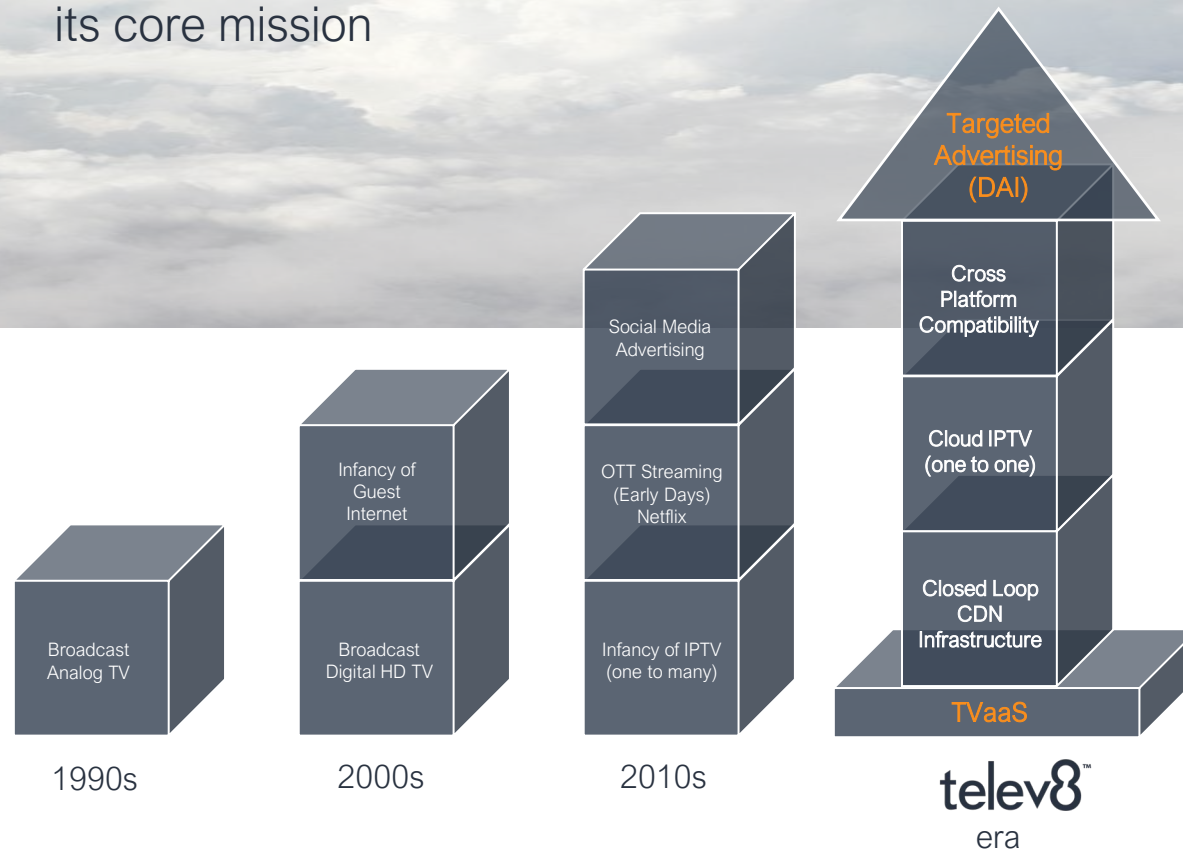

extend telev8 mobile device management

reduce cost of ongoing service and support by utilizing our mobile device management platform reducing the need for truck rolls and ability to provide significantly enhanced remote management capabilities

telev8 – cut the cost – not the cord

the telev8 (r)evolution

after decades of legacy TV, **telev8** is the first to assemble all critical components for delivering app-based cloud TV to commercial venues and out-of-home markets with highly targeted advertising as its core mission

telev8 = the TV (r)evolution

telev8

commercial
television to
out-of-home
verticals

telev8™

cloud-based TV for commercial verticals

- provides what guests **want** – streaming apps and casting
full compliment of cable programming, streaming apps and ability to cast guest's subscribed content
- lowers cost of TV delivery with **best-in-class** technology
operates via property Wi-Fi (an industry first) via closed-loop CDN†, reduced bandwidth consumption due to edge cache capability, trick play & catch-up TV
- no requirement for expensive **commercial TVs** or need to rewire
works with consumer TVs connected via a certified Wi-Fi Internet network – also works with a wired ethernet connection
- hotel chain/brand – **value proposition**
targeted advertising to pay and promote brand initiatives, lowering cost of content & equipment costs for property owners

† CDN = content distribution network over closed-loop Internet circuit

telev8 = the TV (r)evolution

telev8

reshaping
commercial
television for
hospitality &
its brands

telev8™

TeleV8 Managed Service - Platform Architecture

telev8 overview

telev8 intellectual property

- **TiVo exclusive hospitality partnership** – for best-in-class streaming television app designed for commercial multi-tenant properties – telev8 TVaaS platform
- **feed control manager (FCM)** – for edge cache, server-side ad insertion (SSAI), over-the-air (OTA) channel ingest and on-premise content recording with full feature rich capabilities
- **guest room experience (GRX)** – technology includes enterprise license for Android TV, UI/UX design, PMS and IoT integration, simplified streaming and casting, in-room controls, guest messaging and other technology integrations
- **operational support system (OSS)** – for provisioning, subscriber device management, billing, GRE control, performance remote management and full featured reporting and analytics
- **multiple provisional patent applications filed** – we have identified multiple method and processes that we have implemented as a direct result of telev8's engineering efforts building and deploying the first commercial linear television streaming platform for out-of-home and multi-tenant venues. We look forward to finalizing these patent applications imminently.

telev8 detailed overview

Proven Streaming Product/Platform (TiVo)

TIVO

TiVo exclusive hospitality partnership – for best-in-class streaming television app designed for commercial multi-tenant properties – telev8 TVaaS platform

Telev8 and TIVO are exclusive partners for commercial venues/out-of-home markets including Hospitality, Healthcare, Senior Living, MDU and all multi-tenant spaces

- 4+ Years of active co-development for out-of-home markets/multi-family
- 15+ Years of Technology Development in Platform
- \$400+M invested
- 177+ Patents – full license including IP for all feature/functionality

RICH FEATURES

Technologically Advanced Feature Functionality

- nDVR trick play (Pause/RW/FF) customizable by channel
- 72-hour Catch-up TV customizable by channel
- Accelerates shift to advanced, reliable terrestrial feeds from traditional satellite feeds
- Full edge cache integration to reduce WAN congestion
- Secondary channel ingest capability, seamless look and feel for OTA (local programming), genre-based (ad-supported channels), curated channels and traditional cable channels

Transport & Content

GLOBAL PARTNER

Approved by networks as transporter with some content distribution rights directly with content owners and/or Co-Op/distributor(s)

- Established Global CDN (content distribution network – 50 Gbps Private Network to nearly 600+ POPs (255 in USA alone)
- Full Transport rights for 500+ channels
- Accountability to content licensor
- Distribution rights to provide cost-effective programming to Hospitality Industry (L&I)
- 99.999% uptime

ADVERTISING

Targeted advertising/Dynamic Ad Insertion capability

- HEVC (H.265) 4K compatible
- SSAI (Server-Side Ad Insertion) integration
- 75+ channels with full licensing for 100% ad insertion (14 to 16 minutes per channel per hour)
- Ability to custom curate channels with ad insertion
- Ability to insert customer, brand or other for ad insertion into linear streams
- Pre-roll advertising in GRE
- Does require PII (personal identifiable information)

NextGen Android TV thin Client

UEI PARTNERSHIP

Unique partnership to advance hardware and software integration for end user experiences

- AndroidTV Enterprise license
- Chromecast integration – Casting capability built into in-room Android TV client
- Operator Tier Support/full remote access providing remote service and support
- Approved for Hospitality Industry deployments
- Auto-login capability with several applications
- Netflix, Apple+, Prime App certification as well as several others
- Cache is cleared by guest or at check-out
- If no PMS integration – credentials can be cleared on a daily timed schedule.

THIN CLIENT

Robust multi-functional device designed for large scale deployment and remote manageability

- AndroidTV
- ✓ Android 12 Operating System, moving to Android 14 in two years
- ✓ AndroidTV client is guaranteed interoperability for minimum of 5 years
- Does **NOT** require a wired Ethernet connection
- ✓ Can operate via Wi-Fi, and supports Wi-Fi 6
- ✓ Comes with a wired Ethernet port for hard wired Ethernet connection.

GRE & PLATFORM

DESIGNED BY TELEV8

UI/UX and back-office capability designed by industry experts for hospitality technology experts

- Full Guest-room Entertainment (GRE) platform with CMS – no requirement for end-user guest credentials to access Google Play Store
- GRE is fully customizable (HTML5)
- Full PMS API integration
- Full device cross compatibility – support include:
 - ✓ Web App (LG Pro:Centric and Samsung Tizen)
 - ✓ AOSP (Android Open-Source Project)
 - ✓ Android TV – telev8 app in Google Play Store
 - ✓ Amazon FireTV – telev8 app in Amazon Store
 - ✓ Apple TV/tvOS and iOS – telev8 app in Apple Store

PLATFORM SUPPORT

Does not require a commercial television with auto remote-control configuration

- Does not require Pro:Idiom or serial MPI/MTI interface
- No need for internal ATSC TV tuner – only requires television monitor and speakers
- Complete with UEI's QuickSet software – Auto programs remote control
 - ✓ on/off, volume, mute and auxiliary input
 - ✓ Battery level alert reporting Majority of consumer televisions (non-smart) will work with no custom configurations

licensing & partnerships

strategic partners

- TiVo – technology, transport and Intellectual Property licenses
- UEI (Universal Entertainment Inc.) – for Google Android TV device w/TV integration, DRM (no need for Pro:Idiom), full device remote management, remote control design
- Packet Fabric – Data Centers telev8 utilizes
- Packet Fabric – for Internet and Private Line connections
- AWS – for operational support, hosting

programming agreements

- DirecTV for Business (Hospitality L&I only), Warner Brother's Discovery; Paramount+ w/Showtime, HBO, PlutoTV
- 65+ channels via direct media agreements for genre-based content
- full programming availability via consolidator/CO-OP and other content aggregators
- major media companies have all authorized telev8 via TiVo transport rights
